Wall & ceiling plastering

Gypsum Barez

BAREZ GYPSUM

A well-known, high-volume gypsum that suits every climate

Initial set	Final set	Whiteness	Purity
8–12 min	20–30 min	87%+	90%+

Product overview

After calcination this gypsum is brought to the required grain size by a pin mill. Barez is a long-established, well-known product with multi-purpose use for plastering walls and ceilings. For the best result nothing else, such as cement or lime, should be mixed into it.

Applications

- Plastering of building walls and ceilings

Technical features

- Initial set 8–12 minutes, final set 20–30 minutes
- Suitable for any climate
- Easy to apply
- High strength and hardness
- Available in 100–120 micron grain sizes
- Whiteness above 87% and purity above 90%

Packaging

25 kg and 30 kg polypropylene bags

Practical tip

Plasterers know it well and it has a long track record in the market. For a better result, do not mix cement or lime into it.
