Interior plastering

Super Gypsum Matin

MATIN SUPER GYPSUM

Interior plastering gypsum; no special surface preparation needed

Initial set	Final set	Whiteness	Purity
9–13 min	21–30 min	87%+	90%+

Product overview

Matin Super Gypsum is made for interior plastering, using advanced equipment and with high strength. Thanks to its distinctive properties it needs no special substrate preparation – the surface only has to be free of dust and oil.

Applications

- Plastering and finishing of interior surfaces

Technical features

- Laboratory initial set 9–13 minutes, final set 21–30 minutes
- Coverage per m² at 1 mm thickness: about 0.7 kg
- No sieving (meshing) required
- Available in 100–120 micron grain sizes
- Whiteness above 87%
- Purity above 90%

Packaging

25 kg and 30 kg polypropylene bags

Practical tip

About 0.7 kg per m² is used for every 1 mm of thickness. The surface only needs to be free of dust and oil.
